Lisa Waber, *East*

Melissa Lancaster, *Southeast*

IEP Resource Center

Jolly Piersall, *Director*

Leah Nellis, *Consultant*

The purposes for assembling this committee included the following:

- Identify what questions educators and parents have about statewide assessment requirements and anticipated changes in the future;
- Identify what resources are needed to assist educators and families in making informed, appropriate, and collaborative decisions about statewide assessment for students with disabilities;
- Develop resources for Case Conference Committees (CCC) to use when discussing and making decisions about participation in statewide assessment options and use of accommodations; and
- Inform the work of the resource centers related to statewide assessment professional development needs.

This document and additional resources are available on the IIEPRC website:

www.indianaerc.org

This document is designed to assist Case Conference Committees (CCCs) to engage in informed discussions and make appropriate decisions about participation in statewide assessment and use of accommodations for students with disabilities. The document is organized into two sections. The first section includes common questions and corresponding answers and suggestions. The second section includes a variety of tables, checklists, and tools for use by CCC members.

Statewide Assessment Common Questions and Answers

1. Why are students with disabilities expected to achieve grade-level academic content standards?

The focus of legislation is aimed at accountability of all students. Both federal and state laws require that all students with disabilities participate in statewide assessments in order to hold schools accountable for the academic performance of students. The practice of inclusion of students with disabilities with their non-disabled peers is moving across the country and internationally to provide access to general education curriculum. Teachers are providing instruction for all students to access grade-level content standards by using a variety of instructional strategies based on the needs of the students. Students with disabilities are provided accommodations during classroom instruction and assessments to help level the playing field and promote equal access to grade-level curriculum.

Teachers are providing instruction for all students to work toward grade-level content standards by using a variety of instructional strategies based on the needs of the students. Students with disabilities are provided accommodations during classroom instruction and assessments to help level the playing field and promote equal access to grade-level curriculum.

Most states are moving towards next generation assessments for academic content areas. This presents a unique opportunity for educators to include all students with disabilities in accessing grade-level content standards.

2. What are the Indiana statewide assessments and who participates?

1. ISTEP+

The purpose of the *Indiana Statewide Testing for Educational Progress-Plus (ISTEP+)* program is to measure student achievement in the subject areas of English/language arts, mathematics, science, and social studies for grades 3-8 and 10. In particular, ISTEP+ reports student achievement levels according to the *Indiana College and Career Ready Standards* that were adopted by the Indiana State Board of Education. The ISTEP+ assessment is criterion-referenced and is designed to measure students' mastery of the standards.

2. End of Course

The *ISTEP+ End of Course Assessments (ECAs)* are criterion-referenced assessments developed specifically for students completing their instruction in Algebra I, or English 10.

3. IREAD-3

The purpose of the *Indiana Reading Evaluation and Determination (IREAD-3)* assessment is to measure foundational reading standards through grade three. Based on the *Indiana Academic Standards*, IREAD-3 is a summative assessment that was developed in accordance with HEA 1367 (also known as PL 109 from 2010) which "requires the evaluation of reading skills for students who are in grade three beginning in the Spring of 2012 to ensure that all students can read proficiently before moving on to grade four."

4. Alternate Assessment (ISTAR)

Federal law (IDEA 2008) and state law require that all students participate in Indiana's assessment system. For most students with special needs, this law requires participation in ISTEP+ assessments, with or without accommodations. For students with significant cognitive disabilities in grades 3-8 and 10, however, the Case Conference Committee may determine that an alternate assessment based on alternate achievement standards (AA-AAS) is the most appropriate assessment.

5. ISTAR-KR (Kindergarten Readiness)

The purpose of *ISTAR Kindergarten Readiness (ISTAR-KR)* is to measure skills in children from infancy to kindergarten. A derivative of Indiana's Early Learning Standards (which are part of the Foundations to *Indiana Academic Standards*), ISTAR-KR is aligned to the *Indiana Academic Standards* for Kindergarten in the areas of English/language arts and mathematics and includes three functional areas: physical, personal care and social-emotional skills. Data from ISTAR-KR assessments are used in state reporting for PK students receiving special education services. The assessment may also be used for local purposes in grades PK through 1.

6. English Language Proficiency Assessment (WIDA)

The purpose of the English Language Proficiency assessments is to determine a student's level of English proficiency for students in grades K-12. WIDA (World-Class Instructional Design and Assessments) is the assessment administered in Indiana. WIDA ACCESS Placement Test (W-APT) is administered upon a student's arrival in the United States, to determine which English Learner (EL) services are appropriate for the student. The annual assessment, ACCESS for ELLs (Assessing Comprehension and Communication in English State-to-State for English Language Learners) is

administered in January and February, to determine the student's current level of English proficiency. The annual assessment is also used for accountability purposes.

7. **Accuplacer**

Indiana requires public and state-accredited nonpublic school students who meet specific criteria to take a college- and career-readiness exam in 11th and 12th grades and potentially receive remediation.

8. **NAEP**

The purpose of the *National Assessment of Educational Progress* (NAEP), also known as "The Nation's Report Card," is to determine performance for a selected sample of students within Indiana. NAEP is administered annually to students in grades 4, 8, and 12, and can be used to compare student performance across the United States and over time.

9. **College Placement Exams (e.g. PSAT, SAT, AP, PLAN, ACT)**

The purpose of the college placement exams is to prepare students to enter college. Typical accommodations that are agreed upon during a case conference committee may not be eligible for use on these exams. Please reference the following links for more information:

- PSAT, SAT, AP: <https://www.collegeboard.org/students-with-disabilities>
- PLAN and ACT: <http://www.actstudent.org/regist/disab/>

3. What is the difference between an accommodation and modification?

Modification

Beginning with IDEA 2004, the term "modification" is no longer used in relation to district-wide and statewide testing, because the federal No Child Left Behind Act (NCLB) mandates that students be tested using the same standards as those used for non-disabled peers.

A modification is made when the general education curriculum is altered or the performance level expected of students is changed (Nolte & McLaughlin, 2005). A modification is when a student is taught something

different from the rest of the class or taught the same information but at a different level of complexity to meet the needs of the student. Prior to the 2004 reauthorization of the Individuals with Disabilities Education Act (IDEA 2004), the term "modifications" referred to changes in the delivery, content, or instructional level of district-wide or statewide tests for students receiving special education services. Modifications resulted in lowering the expectations and standards by which students with disabilities were assessed. Beginning with IDEA 2004, the term "modification" is no longer used in relation to district-wide and statewide testing, because the federal No Child Left Behind Act (NCLB) mandates that students be tested using the same standards as those used for non-disabled peers.

Nolet and McLaughlin (2005) identify the following examples of modifications:

1. The student is taught something different from the rest of the class.
2. The student is taught the same information, but at a different level of complexity.
3. The student has a reduced assignment (for example, has fewer questions to answer).

4. The student uses a lower-level reading textbook, which covers similar subject content.

Parents should be aware that if the student's curriculum is modified so that it is no longer focused on grade-level standards, the student's course of study may be changed to one that leads to a certification of completion, not to a high school diploma.

Parents should be aware that if the student's curriculum is modified so that it is no longer focused on grade-level standards, the student's course of study may be changed to one that leads to a certification of completion, not to a high school diploma. The decision to make modifications should not be made lightly or by one individual, but requires a CCC team decision. While modifying a student's curriculum generally leads to a certificate of completion, there may be instances where modifying a student's curriculum for a short time could enable a student address a skill specific weakness and resume grade-level standards. This is particularly true for young students who may need some modifications early in their school career but are able to catch up and continue on diploma track.

Accommodations

Accommodations for Instruction

An accommodation is a support or service that is provided to help a student fully access the general education curriculum. Accommodations provided to a student with disabilities during classroom instruction and assessments must also be provided to the student during state assessments, if permitted.

An accommodation is a support or service that is provided to help a student fully access the general education curriculum. Accommodations are changes in the way that materials are presented or students respond (Elliott & Thurlow, 2006). The

reason for providing accommodations is that they enable the student to bypass (or partially bypass) the effects of the disability. An accommodation does not change the content or the complexity of what is being taught, but is a way of providing equal access for the student with a disability to grade-level content and is meant to “level the playing field” with non-disabled peers. Accommodations do not reduce expectations for learning; rather, they change how the content is being taught, made accessible, and/or assessed. What the student is expected to master does not change, and the objectives of the content or activity remain intact.

Accommodations are practices or procedures that are used during classroom instruction so that the teacher has a valid measure of what students with disabilities know and can do. In addition, accommodations allow students with disabilities to complete the same assignments as their non-disabled peers. School assignments and tests completed with accommodations should not alter the content, give an unfair advantage, or change what a test measures. Furthermore, school assignments and tests including accommodations are graded the same way as those completed without accommodations. Accommodations make it possible for students with disabilities to show what they know without being impeded by their disability.

Accommodations provided to a student with disabilities during classroom instruction and assessments must also be provided to the student during state assessments, if permitted. Educators need to be familiar with state policies and procedures for administering statewide assessments and accommodations. State accommodation guidance is summarized in Appendix C of the *Indiana Assessment Program Manual* which is available on the IDOE website at <http://www.doe.in.gov/sites/default/files/assessment/appendix-c-accommodations-guidance.pdf>. Guidance regarding appropriate testing format for students – either computer-based or paper-and-pencil – has been provided by the IDOE and is available at <http://www.doe.in.gov/sites/default/files/individualized-learning/patins-computer-pencil-letter-checklists.pdf>.

Accommodations for Statewide Assessment

Assessment accommodations are changes in testing materials or procedures that enable students to participate in assessments in a way that assesses abilities rather than disabilities. Without accommodations, assessments may not accurately measure students' knowledge and skills.

Assessment accommodations are generally grouped into the following categories:

- Presentation (e.g., repeat directions, read aloud, large print, braille)
- Equipment and materials (e.g., calculator, amplification equipment, manipulative)
- Response (e.g., mark answers in book, scribe records response, point)
- Setting (e.g., study carrel, student's home, separate room)
- Timing/Scheduling (e.g., extended time, frequent breaks)

4. What accommodations are needed so that a student can be in the general education setting?

Selecting accommodations for instruction and assessment is the role of a student's Case Conference Committee (CCC). Accommodations should be chosen based on the individual student's need for the accommodations. After considering the student's individual characteristics, the CCC should identify inclusion needs that require accommodations. When these accommodations are used according to plan, the student should be able to demonstrate what he or she knows during instruction and on assessments. Be aware that some accommodations used in a general education classroom are not allowable on the statewide assessment.

Accommodations should be chosen based on the individual student's need for the accommodations. Accommodations used in a general education classroom that are not allowable on the statewide assessment can potentially hinder the student's success on that assessment measure.

Elliott and Thurlow (2006) suggest six steps to take in identifying accommodations for individual students:

1. Ask the student what helps him/her learn or perform better and what gets in the way of showing what you know and can do.
2. Ask parents and other family members what they do to help the student complete household chores or homework.
3. Consider the strengths and weaknesses in areas linked to the curriculum, identify those skills or behaviors that consistently get in the way of learning.
4. Teach the student how to use accommodations that might be provided.
5. Observe the effects of accommodations provided to determine whether the accommodation is being used and the extent to which it seems useful to the student.
6. Collect data on the effects of accommodations that are used by the student.

5. Who is involved in making accommodation decisions?

The CCC must make assessment and accommodation decisions for students with disabilities based on individual need in accordance with state and federal guidelines. Students with disabilities must be provided accommodations based on individual need as long as the accommodations do not invalidate the assessment.

6. What should the CCC consider when selecting accommodations?

To assure students with disabilities are engaged in standards-based instruction, the CCC must participate in the planning process and data review to make sure appropriate accommodations are selected for the student that enable access to grade-level instruction and participation in statewide assessments.

To assure students with disabilities are engaged in standards-based instruction, the CCC must participate in the planning process and data review to make sure appropriate accommodations are selected for the student that enable access to grade-level instruction and participation in statewide assessments. The CCC needs to be familiar with the grade-level standards when making

decisions about accommodations and participation in the general education curriculum.

During the decision making process, the CCC should take into account the following:

1. Student characteristics that need to be considered so that accommodations reduce the effect of the disability.
2. Instructional tasks where students are expected to demonstrate grade-level state standards content knowledge and skills, such as assignments and class tests.
3. Consistency with the standards-based IEP for classroom instruction and assessments, and an emphasis on fidelity of implementation for accommodations and achievement standards noted in the IEP.

Students with the most significant cognitive disabilities can participate in the alternate assessment (ISTAR) if the criteria for participation are satisfied. The Case Conference Committee determines, based on the eligibility criteria adopted by the Indiana State Board of Education and the student's individual and unique needs, whether a student with a disability will be assessed using the alternate assessment. The criteria are available at: <http://www.doe.in.gov/achievement/assessment/istar>.

7. How do we document decisions and use of accommodations?

For students with disabilities, determining appropriate instructional and assessment accommodations during the IEP process should be evidenced by reviewing the student’s present level of academic achievement and functional performance (PLAAFP). The PLAAFP is a state and federal requirement which must state “how the child’s disability affects the child’s involvement and progress in the general education curriculum—the same curriculum as non-disabled children”.

The areas in the IEP document where accommodations can be addressed include the following:

1. “Consideration of Special Factors” is where communication and assistive technology supports are considered.
2. “Supplementary Aids and Services” is the area of the IEP that includes “aids, services, and other supports that are provided in regular education classes or other education-related settings to enable children with disabilities to be educated with nondisabled children to the maximum extent appropriate.”
3. “Participation in Assessments” is the section of the IEP that documents accommodations needed to facilitate the participation of students with disabilities in statewide and local assessments.

8. What documentation is needed to evaluate and improve the use of accommodations?

Selecting and monitoring the effectiveness of accommodations should be an ongoing process, and changes should be made as often as needed. It is important that the accommodations selected address the student’s specific areas of need and facilitate the demonstration of skills and knowledge.

9. What is the connection between accommodations and universal design for learning?

According to Indiana’s special education law, Article 7, “Universal design is a concept or philosophy for designing and delivering products and services that are usable by people with the widest possible range of functional capabilities.” Implementing universal design is not simply a matter of providing digital instruction and assessment on computers, but rather working diligently to ensure that the products, services, policies, and/or practices related to the instruction and assessment provide options and supports that enable all students to participate and to achieve.

Implementing universal design is not simply a matter of providing digital instruction and assessment on computers, but rather working diligently to ensure that the products, services, policies, and/or practices related to the instruction and assessment provide options and supports that enable all students to participate and to achieve.

Technology used for instruction and assessment must include a range of flexible options that can be tailored to individual needs and preferences and must ensure interoperability with assistive technologies used by some students. As the move toward digital delivery of instruction and assessment gains momentum, it is important to keep in mind that not all digital materials or delivery technologies include flexible features that broaden usability and accessibility. These features need to be sought out when considering the acquisition of both digital content and technological systems for the delivery of the content.

Incorporating the principles of Universal Design for Learning into the planning and delivery processes of instruction and assessments can lead to improved engagement and outcomes for all students. Universally-designed instruction and assessments enable educators to plan for and engage students across the full range of variability in flexible learning opportunities and to gain a more accurate understanding of what students know and can do. Flexibility in the presentation of instructional content, the ways in which students can respond, and the engagement of students are the core principles of universally-designed learning environments. In the planning process, it is important to consider potential barriers that students may encounter in the learning process and to proactively plan for reducing those barriers in order to ensure access to the content and enable the demonstration of knowledge. Universal Design principles are being considered in design of next generation assessments through item development, field testing and implementation.

Tools, Checklists, and Resources

The following section contains multiple resources designed to be used by educators, families, and Case Conference Committee (CCC) members. The resources include the following:

1. Questions and Considerations During the Assessment and Accommodation Discussion

This resource is organized by steps that occur during the CCC discussion about statewide assessment and accommodations. For each step, questions for parents to ask and information for CCC members to consider are provided.

2. Examples of Accommodations Based on Student Characteristics

This resource provides example instruction and assessment accommodations for specific student characteristics or difficulties. These are simply examples that might be appropriate for a student with a specific need or disability. The examples should not be used as a required list for a given student. Additionally, it is important to note that this table includes assessment accommodations that are not allowable on statewide assessments. The use of such accommodations during other assessment tasks should be discussed in advance with a full

understanding of possible outcomes for the student. Accommodations that are not allowed on statewide assessments are denoted in bold and with an asterisk. This resource was modified with permission from the Council of Chief State School Officers. Additional examples were added by Indiana practitioners and specialists.

3. Decision Criteria and Considerations by Statewide Assessment Option

This table summarizes the participation criteria for the statewide assessment options. Also included are examples of evidence that CCC members might use when making the decision about which assessment option is most appropriate for a given student. Full state criteria are available at <http://www.doe.in.gov/sites/default/files/assessment/appendix-c-accommodations-guidance.pdf>.

4. Diploma Options

Reading, writing and math are essential life skills, and students must demonstrate a basic understanding of English/language arts and mathematics as part of the requirements for graduation. For updated information on diploma options based on expected year of graduation (cohort), please see: <http://www.doe.in.gov/ccr/indianas-diploma-requirements>

5. Graduation Waiver Process

The assessment requirement for graduation can be met in three ways. For updated information on the graduation waiver process, please see: <http://www.doe.in.gov/assessment/meeting-assessment-requirement-graduationwaiver-process>

6. Questions for Parents to Ask About Accommodations

This resource provides sample questions for parents to ask about accommodations. These questions were modified with permission from the Council of Chief State School Officers.

7. After-Test Accommodations Questions

This resource can be used after an assessment with accommodations has been completed. It includes questions that can be used to interview the student about the provided accommodation(s), including whether a specific accommodation was used, whether it was useful, and whether the accommodation should be used again. Any adjustments or difficulties experienced by the student can also be noted. This resource was modified with permission from the Council of Chief State School Officers.

Questions and Considerations during the Assessment and Accommodations Discussion

Step 1: Ensure all decision makers understand the purpose of the statewide assessment.	
Questions for Parents to Ask	Considerations for CCC
<ul style="list-style-type: none"> -What is the purpose of the assessment? -How are the results used? -Who receives my child’s assessment results? 	<p>Results from statewide assessments are used for multiple purposes. For example, aggregate assessment results are used for school accountability purposes. For an individual student, assessment results are important because they provide teachers, parents, and students themselves with information about skills, proficiency, and achievement on Indiana academic standards.</p>
Step 2: Ensure all decision makers are aware of the statewide assessment options.	
Questions for Parents to Ask	Considerations for CCC
<ul style="list-style-type: none"> What assessments are grade-level peers taking? What assessment options are available for my child? What standards are measured by each assessment option? 	<p>Assessment options exist so that the CCC can select the most appropriate assessment for a given student. The first option considered should be the standard assessment (ISTEP+ 3-8 and 10, IREAD-3, and ECAs and WIDA when applicable). Other options, such as the alternate assessment (ISTAR and WIDA Alt when applicable), are available for students for whom general assessments are not appropriate due to the severity and nature of the student’s disability and the intensity of services needed by the student.¹</p>
Step 3: Ensure all decision makers understand the standard administration procedures for the statewide assessments.	
Questions for Parents to Ask	Considerations for CCC
<ul style="list-style-type: none"> -How is each assessment option administered? -What accommodations are allowable for each assessment? -Are the accommodations allowed on statewide assessments also provided for local assessments? -What is the impact of needed accommodations not being permitted on statewide assessments? 	<p>Guidelines on the standard administration procedures and allowable accommodations for each statewide assessment option are set by IDOE. Accommodations selected for use on statewide assessments should be ones that the student is using on a regular basis for classroom instruction and assessments. Allowing students to use accommodations on a routine basis in the classroom that are not permitted on statewide assessments can negatively impact the student’s ability to demonstrate knowledge and skills on statewide assessments.</p>

¹ For more information on Indiana Assessments go to: <http://www.doe.in.gov/assessment>

Step 4:	
Ensure all decision makers understand the consequences associated with each statewide assessment option.	
Questions for Parents to Ask	Considerations for CCC
<ul style="list-style-type: none"> -How will my child's test scores be used? -How does the assessment decision influence programming and services for my child? -How does the selected assessment option impact my child's chance to graduate with a diploma? 	<p>The decision about which assessment option will be utilized should not drive placement or services for the student. Students for whom alternate assessment is the most appropriate assessment are learning content based on grade-level alternate achievement standards and are not earning credits toward a high school diploma.</p>
Step 5:	
Determine which accommodations are appropriate and necessary for the student.	
Questions for Parents to Ask	Considerations for the CCC
<ul style="list-style-type: none"> -What are my child's needs and preferences? -What accommodations will reduce the effect of my child's disability on assessment results? -What accommodations are regularly used by my child during instruction and classroom assessments? Are the accommodations permitted on statewide assessments? 	<p>A student's need for assessment accommodations should be based upon a variety of information and data from students, teachers, and parents. Information from the student includes how helpful the student perceives an accommodation is/was, what accommodations the student prefers, and how willing the student is to learn to use a given accommodation. Input from teachers might include perceptions about the impact and usefulness of an accommodation, information about the student's performance when using/not using assessment accommodations, and what staff training is needed.</p>
Step 6:	
Determine which statewide assessment option will be used for the student.	
Questions for Parents to Ask	Considerations for the CCC
<ul style="list-style-type: none"> -Which assessment option will provide the best information about my child's skills? -Are any of the accommodations that my child needs not allowable on the assessments? -What is the rationale for the selected assessment option? 	<p>Accommodations should be selected based upon the student's needs and difficulties. Selected accommodations should reduce the effect of the child's disability on assessment results and performance.</p>

Step 7: Ensure assessment accommodation decisions are documented in the IEP.	
Questions for Parents to Ask	Considerations for the CCC
-Are the necessary and appropriate accommodations included in the IEP? -What is the rationale for the accommodations?	The present levels section of the IEP should include information about what accommodations have been effective during instruction and classroom assessment. This information can assist the CCC in making decisions about statewide assessment participation. The IEP should document the CCC's decision about what assessment option will be administered and what accommodations are necessary. It is important to remember that the decision about what statewide assessment the student will take should be re-visited and changed when needed.
Step 8: Communicate selected assessment accommodations to the person responsible for administering the statewide assessments.	
Questions for Parents to Ask	Considerations for the CCC
-Who will make sure that these accommodations are used on statewide assessments? -What information will be gathered about the usefulness of the accommodation?	Decisions about statewide assessment participation and accommodations need to be communicated to the person responsible for test administration in the school corporation. In most school corporations, this involves the teacher of record and the test coordinator. The CCC should discuss what information will be collected about the administration and usefulness of the accommodations during the assessment administration so that decisions about future accommodations can be well-informed.
Step 9: Following administration, evaluate whether the selected accommodations were appropriate and necessary for future assessments.	
Questions for Parents to Ask	Considerations for the CCC
-Were the accommodations used? -Were there any difficulties with the accommodations? -Are any adjustments needed? -Should the accommodations be used again? -Does the selected assessment option seem appropriate for future administrations? -What did my child think about the accommodations?	Information and data regarding the usefulness, appropriateness, and any difficulties implementing the accommodations during previous statewide assessments should be discussed by the CCC. This information should guide decisions about future administrations of the assessment and should be used to determine whether a different assessment option needs to be chosen and whether accommodations need to be changed or discontinued.

Examples of Accommodations Based on Student Characteristics

STUDENT CHARACTERISTIC: BLIND OR LOW VISION

Appendix A: Questions for Parents to Ask About Accommodations

Questions about accommodations during *Instruction*

Is my child expected to reach regular or alternate achievement standards? Does this affect what types of accommodations are available to my child during instruction or on assessments?

What accommodations does my child need to access and reach academic standards?

Are there accommodations that could be allowed during instruction that are not currently being provided?

Are there accommodations being used at home that could be used during instruction to help my child access and learn content and/or help in performing certain academic tasks?

Are the accommodations my child is receiving during instruction meant to be a temporary support? If so, what is the plan to help determine when to phase out or discontinue the use of a certain accommodation?

How are the staff members who work with my child providing accommodations (across general, special education, or other staff)?

Questions about accommodations during *Assessment*

What are the tests my child needs to take, what do they measure (e.g., regular or alternate academic standards), and for what purpose is each given?

Are the accommodations allowed on state tests also provided for local tests?

Can my child participate in part of an assessment with or without accommodations?

If my child is not taking the general assessment, is it because the test is “too hard” or because the accommodation needed is not allowed on the assessment?

Are there consequences for allowing certain changes to how my child participates in a test? How will my child’s test scores count?

Do consequences of accommodations vary by type of test?

Questions about accommodations during *both Instruction and Assessment*

Is the need for each accommodation documented in my child’s IEP?

Are there too many or too few accommodations being provided?

What are my child’s preferences for specific accommodations?

If my child needs accommodations, how will they be provided?

If an accommodation used during instruction is not permitted on a test, is there another option that is allowed? If so, has it been documented and tried during instruction first? If not, how is my child being prepared to work without the accommodation before the test?

List other questions here.

Appendix B: After-Test Accommodations Questions

Use this form after a test to interview a student about the provided accommodation(s): whether it was used, whether it was useful, and whether it should be used again. Also note any adjustments or difficulties experienced by the student in either how the accommodation was administered or in using the accommodation during the assessment.

Student _____ Date _____

Questions	Test Taken (List)			
Was the accommodation used?	Yes / No	Yes / No	Yes / No	Yes / No
Was the accommodation useful?	Yes / No	Yes / No	Yes / No	Yes / No
Were there any difficulties with the accommodation? Are adjustments needed?	Yes / No	Yes / No	Yes / No	Yes / No
Should the accommodation be used again?	Yes / No	Yes / No	Yes / No	Yes / No
Adjustments or Difficulties Experienced				

Student signature _____

Assistant signature (if applicable) _____

Appendix C: Assessment Accommodations Agreement

This form communicates the assessment accommodations that I need as a student. These accommodations are listed on my Individualized Education Program (IEP).

I, _____,
(Student's name)

need the following accommodations to take part in this assessment:

- (list accommodation)
- (list accommodation)
- (list accommodation)

If I need more information about these accommodations, I can talk to:

(Name of special education teacher, parent, principal, and/or related service provider)

Thank you for helping me to do my best on this test!

(Student signature)

(Date)

Appendix D: Do's and Don'ts When Selecting Accommodations

Do ... make accommodations decisions based on individualized needs.

Don't ... make accommodations decisions based on whatever is easiest to do (e.g., preferential seating).

Do ... select accommodations that reduce the effect of the disability to access instruction and demonstrate learning.

Don't ... select accommodations that are unrelated to documented student learning needs or are intended to give students an unfair advantage.

Do ... be certain to document instructional and assessment accommodations on the IEP or 504 plan.

Don't ... use an accommodation that has not been documented on the IEP or 504 plan.

Do ... be familiar with the types of accommodations that can be used as both instructional and assessment accommodations.

Don't ... assume that all instructional accommodations are appropriate for use on all assessments.

Do ... be specific about the where, when, who, and how of providing accommodations.

Don't ... simply indicate an accommodation will be provided "as appropriate" or "as necessary."

Do ... refer to state accommodations policies and understand implications of selections.

Don't ... check every accommodation possible on a checklist simply to be safe.

Do ... evaluate accommodations used by the student.

Don't ... assume the same accommodations remain appropriate year after year.

Do ... get input about accommodations from teachers, parents, and students, and use it to make decisions at IEP team or 504 planning committee meetings.

Don't ... make decisions about instructional and assessment accommodations alone.

Do ... provide accommodations for assessments routinely used for classroom instruction.

Don't ... provide an assessment accommodation for the first time on the day of a test.

Do ... select accommodations based on specific individual needs in each content area.

Don't ... assume certain accommodations, such as extra time, are appropriate for every student in every content area.

Appendix E: Assessment Accommodations Plan

Use this questionnaire to collect information about needed accommodations from the student's perspective. The questions can be completed independently or as part of an interview process. Whatever method is used, however, be certain that the student understands the concept of an accommodation, providing examples as necessary. Also, provide a list of possible accommodations to give the student a good understanding of the range of accommodations that may be available.

1. Think about all the classes you are taking now. Which is your best class?

2. Explain what you do well in this class.

The things you said you can do well above are your strengths. For example, you may have mentioned reading, writing, listening, working in groups, working alone, drawing, or doing your homework as some things you can do well. If you said you really like the subject, have a good memory, and work hard in class, these are also examples of your strengths.

3. Now ask yourself, "What class is hardest?"

4. What's the hardest part of this class for you?

The things you said were hardest are areas you need to work on during the school year. For example, you may have listed paying attention in class, reading the book, taking tests, listening, staying in the seat, remembering new information, doing homework, or doing work in groups.

These are all things in which an accommodation may be helpful for you.

5. In the list that follows, write down all of the classes you are taking now. Then look at a list of accommodations. Next to each class, write down what accommodation(s) you think might be helpful for you.

Class List

Classes	Accommodations

This questionnaire was adapted from *A Student's Guide to the IEP* by the National Dissemination Center for Children with Disabilities (<http://nichcy.org/pubs/stuguide/st1book.htm>). Retrieved July 28, 2005.
